

# Mill Road Corridor Study

## INFORMATION DAYS

Papakura District Council is developing a long term plan for managing the road network between Alfriston and Drury.

The project was first proposed as part of the Southern Sector Strategic Transport Study and creates an essential link from Manukau through Papakura District to Drury. This stage of the project is about planning and does not involve any construction.

To help keep people up to date and to gather feedback from the community, we have organised a series of information days:
